

DESOI Pressure tank - Volume 4

No. 13015

Description

DESOI Pressure tank - Volume 4 serves for the injection of low-viscous epoxy resins. The material container is placed directly in the internal protective container. The material output is carried out via the ascending pipe. The pressure regulator controls the working pressure.

Material to be used

- Low-viscous epoxy resin

Delivery range

pressure vessel with pressure regulator and sliding coupling straight \varnothing 2.5 mm (*separately enclosed*), internal protective container, 3 m LP material hose \varnothing 6 mm and LP ball valve with mouth piece

1. Manometer

2. Safety valve

Technical data

Working pressure	4.1 bar
Pressure ratio	1 : 1
Capacity	4 l
Weight	5.6 kg
L x W x H	19.5 x 19.5 x 44 cm
